## FLY Endurance Saddles : Revolution in the world of lightweight horse saddles !

Developed and designed  
in closed collaboration  
with some of the best  
international  
endurance riders,  
the *FLY* ultralight carbon  
saddles, dedicated to  
equestrian endurance sport,  
were declined, initially, in  
two models :  
ClassX (flat seat)  
and  
DunX (deep seat).

# LATEX or LEATHER. NEW SENSATIONS GUARANTEED.

For each *FLY* model, the arcade opening is 21 cms, the reach of the skates on the horse's back is 48 cms, the seat is 17.5" (SyntX) and 17.0" (LuX), and the weight of the nude saddle is 1.300 grams (SyntX) and 1.800 grams (LuX), i.e. +/- 3,000 and 3,500 grams fully equipped with straps, webbers, stirrups and girth.

The seats of the *FLY* saddles are covered with synthetic memory foams (SyntX models), or italian resistant and comfortable leather (LuX models).

# NEVER MIND THE PROBLEMS

HERE ARE THE

**FLY** sADdLeS

All of the *FLY* saddles are available in a large range of colors and have to respond to a strict level of quality control, even their price stays reasonable.

# ULTRA LIGHT CARBON FLY STIRRUPS

1

Entirely carbon, this very resistant **Carbon FLY Simple Stirrup** weighs barely 300 grams (600 / pair). The sole surface is very large (14 cms width / 10,5 cms depth) and is equipped with an anti-slip pad with no biothane cage or plastic shell at the front, which means that for FEI events, you'll need to ride with heeled shoes.

2

Entirely carbon, this very resistant **Carbon FLY Biothane Cage Stirrup** weighs barely 350 grams (700 / pair). The sole surface is very large (14 cms width / 10,5 cms depth) and is equipped with an anti-slip pad as well as a biothane cage at the front (double layer biothane), meeting FEI safety standards.

3

With a carbon structure, this very resistant **Carbon FLY Plastic Shell Stirrup** weighs barely 400 grams (800 / pair). The sole surface is very large (14 cms width / 10,5 cms depth) and is equipped with an anti-slip pad as well as a plastic shell at the front, meeting FEI safety standards.
